

ELSEVIER CONNECT | *PhD edition*

Free webinars for doctoral students and young scientists who want to raise their awareness of contemporary trends in scientific communication, be better at academic writing, be more effective in using databases and tools for scientists accessing the world's scientific literature, and more.

PROGRAM

10:00-11:30 How to conduct a literature review effectively

Learn about literature review methods and techniques and see examples. We'll explain the process and the various steps and show sample searches in major scientific databases. Discover how ScienceDirect and Scopus can support young researchers. Get tips and tricks to be more efficient!

12:00-13:30 How to write a scientific article in a professional way

Learn more about scientific communication and contemporary publishing trends. Learn about the publishing process and its steps. Discover how to write a scientific article in a professional manner and what to keep in mind when publishing your first articles.

14:00-14:45 Open Q&A session

Take advantage of expert help. Ask any question about scientific communication, publishing, literature search, or tools for scientists. Submit your question in advance: <https://www.menti.com/alzmnnqj64jh> or ask live!

Choose a date and register for Elsevier Connect today!

Trainer: Paula Milewska, Elsevier, p.milewska@elsevier.com

Paula joined Elsevier in 2019, first working as a freelance trainer and then assuming the role of Customer Consultant in 2021, both in support of customers in Central and Eastern Europe. Her expertise is in training—knowing how best to package and present information so it's relevant and actionable.

A librarian by degree and training, Paula worked as a librarian at the University of Lodz, the University of Humanities and Economics in Lodz and the Medical University of Lodz and served as a board member and project manager for the Phenomenon Foundation.

Paula was awarded an undergraduate degree in Polish Philology and a master's degree in Library Science from the University of Lodz and matriculated from the elite leader education program at the School for Leaders Foundation and the Polish-American Freedom Foundation.
